

ELEVATE

i3 has worked with its refining and chemical manufacturing clients to identify the critical issues impacting operations, developed innovative solutions to address gaps, and has served as the catalyst to operationalize the changes needed to drive sustained performance improvements.

2021 Client Partnerships

Led a lean pilot initiative focused on increasing OEE. The key activities included current state value stream mapping, bottleneck analysis, schedule optimization, and training (Standard Work, Leader Standard Work, Tier Processes, Visual Management Boards, 5S, and OEE metrics). OEE improvements are targeted for 12% in 2022.

Partnered on a comprehensive reliability and maintenance analysis effort with a global continuous improvement group. Provided key boots on the ground resources and developed detailed gap closure plans to meet the strategic corporate direction while accounting for site specific prioritization. Key gap closure efforts focused on increased critical equipment reliability, revised PMs, and operator driven reliability.
